Experience

Developer

Company: *Aarhus University*
Years: *August 2017 - January 2017*
Description: *Developer on the university portal* [mit.au.dk](mit.au.dk)*. The portals purpose of the portal is to have an environment where students and administrative persons can handle different tasks.*

Hired as developer for 6 months.

Self Employed

Company: *Stærke Sider*
Years: *January 2016 - ?*
Description: *January 2016 I took a chance and started a life as 100% self-employed. I offer help for WordPress websites, development help and help for online marketing.*

I have been developing WP Plugins, created webshops, websites, helped with WordPress maintenance, advice about online marketing and even been a project manager for a team in the Philippines.

What my customers say about my work.

Developer

Company: *Aarhus University*
Years: *March 2015 - December 2015*
Description: *Developer on the university portal* [mit.au.dk](mit.au.dk)*. The portals purpose of the portal is to have an environment where students and administrative persons can handle different tasks.*

An example of a minor project I have been working on is an import system for holiday payments.

The system gets data in Excel format which needs to be converted to useful data in an Oracle Database.

At the university I worked in the following technologies:
Cold Fusion (CFML), XHTML, HTML, JavaScript, AJAX, CSS, HTML5 and in Oracle Database.

Besides the programming it is worth mentioning that SCRUM was a part of the daily work.

Development specialist / Online Marketing

Company: *Travelmarket A/S*
Years: *2000 - 2015*
Description: *Development specialist, and technical project manager at Travelmarket in the main countries Denmark, Norway and Sweden, and also on the US, UK, DE, ES, PT, FR, MX, IT markets.*

Developing new ideas, SEO, AdWords, Mobile, Making sure that the programming is done and much more is my working day.

I've been working with the following technologies:
Cold Fusion (CFML), NET C#, XHTML, XML, XSLT, JavaScript, AJAX, CSS (also CSS3), HTML5

Besides the programming, I primarily work with MS SQL Server where I use a lot of time creating complex SQL.
My experience also goes for Oracle (have been working on Oracle some years ago), and on MySQL which I work on a few times a month.

In the daily work I also spend time on project management. For that purpose, I've used OnTime as a tool. For good project management in a fast developing industry, you need to have experts to help and inspire. Therefore we/I regularly had some of the best consultants in Denmark in the house as a guide for taking the right decisions.

I have and been working on SEO, Usability, Online Marketing, Business development (gaining better profit, for example better conversion rates) and idea development. Maybe a correct title would be Development Specialist / Internal Consultant. The last 2 years I spend most of the time on ELOQUA (Marketing Automation Tool).

Founder of Spotnaked.com

Years : *2012- ?*
Description: *This is a blog where I write about naturism and travelling as a naturist. The main purpose is to guide, set focus on nude living and to share my own experience as a naturist. The website also functions as a search engine for naturists..*

[You find my blog Spotnaked.com here](#)

Founder of Backpacker Planet I/S

Years : *2003- ?*
Description: *This is the second homepage about backpacking, most of the ideas was the same as on Backpackers Online, but the code below is a complete makeover. The purpose of the page was making a social media for backpackers. In 2008 the homepage was nominated as the best web2.0 page in Denmark, unfortunately, we didn't win. Again all programming, databases and others were made by me, I was also behind a great part of the design, ideas and content.Info: The page is written in the programming language ASP and the database is MS SQL Server. The BackpackerPlanet.com page has just been released in a new form using the Open Source CMS system WordPress.*
